

URETHANE - (OUEZ) URETHANE E-Z

LIFT® PLATES

Ivanko's new Urethane E-Z Lift® plates were developed in response to a groundswell of requests for urethane plates with the Ivanko reputation for performance and durability. Our customers want 'fully functional' urethane plates, with no flat edges, because round plates are required for floor lifting exercises, such as repetition power cleans and dead lifts. The exterior is an understated matte finish: many of Ivanko's customers wanted to avoid the shiny plastic look and slippery feel of conventional urethane plates.

IVANKO E-Z Lift® designs are also available in rubber (ROEZH), and in cast-iron, with slots (OMEZS) or with holes (OMEZH). And of course, many product styles are available in pounds or kilograms.
